# **List of Tables**

## **County Specific Tables**

Hard copies of the county specific tables provided upon request. Tables 1, 2, and 3 can also be found in the electronic version of this report, which is available on the Indiana LTAP website. [www.ecn.purdue.edu/INLTAP/](http://www.ecn.purdue.edu/INLTAP/).

1. Bridge Sufficiency Ratings (BSR's) by County
2. Listing of Structurally Deficient and Functionally Obsolete Bridges by County
3. Estimated Improvement Costs of Bridges Eligible for FHWA Replacement by County

## **County Summary Tables**

4. Summary of County BSR's - Counties in Alphabetical Order
5. Summary of County BSR's - Sorted by Average Sufficiency Rating
6. Summary of County BSR's - Sorted by Percent of Bridges with BSR less than 50
7. Summary of SD and FO County Bridges - Counties in Alphabetical Order
8. Summary of SD and FO County Bridges - Sorted By Percent SD and FO
9. Posted/Closed County Bridges
10. Bridge Inspection Approval Dates
11. Bridge Fund Information - Counties in Alphabetical Order
12. Bridge Fund Information - Sorted by Bridge Fund Rate
13. Bridge Fund Information - Sorted by Funding per Bridge
14. Major Bridge Fund Information
15. Summary of County Bridge Deficient Deck Area

## **INDOT Bridge Tables**

16. Sufficiency Ratings Distributed by County
17. Structurally Deficient and Functionally Obsolete Bridges by County

## **Nationwide Bridge Tables**

18. 2009 Better Roads Bridge Inventory - States in Alphabetical Order
19. 2009 Better Roads Bridge Inventory - Sorted by Combined Percent Substandard
20. HBRRP Selection List – Indiana 2009

## **Preface**

The *2010 Statewide Bridge Sufficiency Rating Report* is now available on the IN LTAP website. This report contains information specific to each of the counties, plus summary tables relating information about all Indiana county bridge conditions and funding levels.

As it is impractical to include printed bridge sufficiency rating and deficiency information for all 12,836 county bridges, this information is provided in electronic format only. It is posted on the LTAP website (<http://www.ecn.purdue.edu/INLTAP/Publications/>) and available on CD-ROM. Information on bridge eligibility for Federal funding can be found at [www.fhwa.dot.gov/bridge/0650dsup.cfm](http://www.fhwa.dot.gov/bridge/0650dsup.cfm).

## **Abstract**

The main purpose of this report is to provide bridge sufficiency rating information for the bridges in each county. This information results from the data generated by the National Bridge Inspection Standards (NBIS) program authorized by the 1968 Federal-Aid Highway Act. The sufficiency ratings are calculated using FHWA software after the Bridge Inspection Reports for each county are reviewed and approved. Therefore, the sufficiency rating information is not included in your county's Bridge Inspection Report.

The county bridge sufficiency ratings and the associated summary reports provide county officials with a quick overall assessment of their bridge needs. County officials are urged to review their county bridge inventory and sufficiency ratings for completeness and accuracy. It is also recommended to refine and upgrade their bridge condition ratings by implementing an aggressive maintenance, rehabilitation, and replacement program. This report discusses the various sources of funding for county bridges and provides information on the level to which Indiana counties use these funds.

The information provided in this report gives county officials a convenient starting point for formulating a long-range plan to cope with their county bridge deficiencies. The sufficiency ratings and the listing of structurally deficient and functionally obsolete bridges are objective data which can be used in establishing a priority based bridge rehabilitation and reconstruction program. Estimated construction improvement costs are included in Table 3 and are based on information from the inspection reports. It should be emphasized that these costs are accurate

enough for network level planning only; costs for specific bridges should not be considered any more than  $\pm 25\%$  accurate. Only bridge and roadway construction improvement costs are included. No roadway maintenance costs are included. The total project costs are normally associated with the proposed bridge improvement projects, including right-of-ways, detours, preliminary engineering, construction inspections, and other incidental costs.

In addition to county specific information, this report includes a series of tables which summarize bridge sufficiency data and bridge structural and functional inadequacy data for all of the Indiana counties. These tables can be used by county officials to determine how their bridges compare to those in other counties.

Also provided in this report are a series of tables which relate to property tax based county bridge funding. These tables provide county officials with a means of comparing their bridge funding to that of other Indiana counties and may provide justification for adjusting their cumulative bridge fund rates.

Several included tables relate to the condition of INDOT bridges. These tables provide general bridge statistics as well as sufficiency and inadequacy data for state bridges on a county by county basis. This information enables county officials to compare the conditions of the county and state maintained bridges within their county.

Two tables summarize the conditions of all of the bridges in the United States. These tables give officials a measure of how Indiana state and local bridges compare to those in other states and to the nation as a whole. The information in these tables is extracted from the "Better Roads" magazine.

Finally, the last table provides a list of all Indiana bridges that are on the FHWA Highway Bridge Replacement and Rehabilitation Program (HBRRP) Selection List for 2009. In order to qualify for HBRRP funds, several criteria must be met. This table provides a list of the bridges in Indiana that meet these criteria and are eligible for HBRRP funds.

## **General Information**

The National Bridge Inspection Standards program, first authorized by the 1968 Federal-Aid Highway Act, provides Indiana county officials with valuable information for assessing their county bridge needs. Essentially all of Indiana's county bridges twenty feet or more in length have been inventoried and rated for safety and structural adequacy.

Since 1970, successive sessions of Congress have provided Federal-aid funds to assist in the cost of bridge rehabilitation and replacement. Federal statutes provide for an area of deficient deck and relative costs for allocating these Federal-aid funds among the states. To implement the allocation of funds, the Federal Highway Administration (FHWA) requires each state to annually report a listing of the most current bridge inspection data available. Indiana's 2010 report, compiled by Indiana LTAP from information furnished by the Indiana Department of Transportation from County Bridge Inspection Reports on file performed between January 2009 and December 2009, received by Indiana LTAP in February of 2010. This data will be used (along with similar reports from other states) as a basis for allocating Highway Bridge Replacement and Rehabilitation Funds among the 50 states and the District of Columbia. The information on your county in this report is a copy of what the FHWA now has in its records.

## **Purpose of County Bridge Sufficiency Rating Report**

Aside from the general background information on the National Bridge Inspection Standards program and Federal-aid bridge funds, the main purpose of the Bridge Sufficiency Rating Report is to distribute the same basic information currently being used by the FHWA to assess Indiana's county bridge needs to the officials in the affected counties. County officials should find this information quite useful in assessing the overall bridge needs of their particular county; however, this information may also be useful in a number of other ways, including programming improvements and establishing/revising bridge funding levels.

The data in Table 1, Bridge Sufficiency Ratings, of this report list the following items for each county bridge:

NBI#

This number is the unique identifier for the bridge in the National Bridge Inventory.

#### Bridge#

This number relates to the number assigned to the bridge in the Bridge Inspection Report, initially compiled by county highway personnel or by the consultant retained by the county.

#### Feature Crossed

This title indicates the name of the ditch, stream, river, road or railroad crossed by the bridge.

#### Facility Carried

This title indicates the name of the county road on which the bridge is located. Missing entries suggest three possibilities: the county road has no name, the name of the road was omitted from the Inspection Report, or the name of the road was not coded into the computer.

#### Sufficiency Rating

This is the *key item* of this report. The *bridge sufficiency rating* (BSR) represents a composite rating weighted to assess the following qualities of the bridge:

Structural Adequacy and Safety  
Serviceability and Functional Obsolescence  
Essentiality for Public Use

The sufficiency ratings vary from 0 to 100, with a lower value indicating a *lower degree of sufficiency*, but a *higher degree of need* for either replacement or repair. Appendix B contains the complete procedure used to compute the sufficiency rating.

### Bridge Deficiency Classifications

To be eligible for Federal-aid funding, a bridge must be both deficient and possess an S.R. value less than 50.00 for replacement or less than or equal to 80.00 for rehabilitation. The term *deficient* indicates that a bridge is either *structurally deficient* or *functionally obsolete*. A structurally deficient bridge is closed or restricted to light-weight vehicles because of deteriorated structural components. A functionally obsolete bridge is one that cannot safely service the volume or type of traffic using it. Comprehensive definitions of these terms as well as the procedure for classifying a bridge in this manner are provided in Appendix A.

## Sources of Bridge Funding

The 2005 Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU) builds upon the previous Transportation Equity Act for the 21<sup>st</sup> Century (TEA-21). Several categories of Federal-aid funds may be used for bridge replacement or rehabilitation. SAFETEA-LU promotes more efficient and effective Federal transportation programs and gives State and local governments more flexibility for solving local transportation problems. It also continues to guarantee funding with a minimum level of funding set that is to be provided each year. Eligible activities have been expanded to include preventative maintenance on all highway systems. According to the legislation, Federal-aid may be used for bridge replacement if the bridge is deficient and the sufficiency rating is 50.00 or less. To use Federal-aid for bridge rehabilitation, the bridge must be deficient and have a sufficiency rating of 80.00 or less. According to rules currently in place for use of Federal-aid by INDOT, Federal-aid funds cannot be used for preliminary engineering or for right-of-way acquisition. A maximum of four bridges per local agency are allowed in the Federal-aid “system” at any point in time. The following is a summary of the several categories of Federal-aid funds available (or potentially available) for the Indiana county bridge program.

Type of Funding	System	Federal Participation	State/Local Match
<b>Bridge Replacement Funds</b>			
State Bridge Replacement and Rehabilitation (65%) (not available for local bridges)	ON	80%	20%
County Bridge Replacement and Rehabilitation (15%)	OFF	80%	20%
County Bridge Replacement and Rehabilitation (20%)	ON/OFF	80%	20%
<b>Surface Transportation Program</b>			
Urban with Population over 200,000	ON	80%	20%
Urban with Population under 200,000	ON	80%	20%
Rural	ON	80%	20%
Minimum Guarantee	ON/ OFF	80%	20%

The county share of a Federal-aid bridge project is generally 20% of the bridge project cost. Counties will normally use one or more of the following sources for matching the Federal-aid funds:

- Cumulative Bridge Funds – CBF
- Motor Vehicle Highway Account – MVHA
- Local Road and Street Account – LRSA
- Major Bridge Funds
- Local Option Highway User Tax Funds – LOHUT
- Highway Bridge Replacement and Rehabilitation Program Funds - HBRRP

MVHA and LRSA funds are available to all local governments in Indiana by a formula distribution. Cumulative Bridge funds and LOHUT funds are local county revenues and therefore vary widely as to availability and amount. Major Bridge Funds are local county revenues available to counties and cities of specified population for longer span bridges. The HBRRP provides Federal-aid funds for bridges that meet the required criteria and are on the selection list.

As in the past, Boards of County Commissioners are urged to maintain a Cumulative Bridge Fund levy commensurate with the county's bridge needs. While this report emphasizes the use of Federal-aid bridge funds, it is unlikely that Federal-aid will ever be available in amounts which will satisfy all county bridge needs. Therefore, Boards of County Commissioners should allocate the major portion of their Cumulative Bridge Funds to the smaller bridge projects while using Federal-aid funds for the replacement or rehabilitation of major stream crossings.

Most Indiana counties fund bridge and approach maintenance, repair, and construction with money from their Cumulative Bridge Fund. These funds are derived from local property taxes. The Cumulative Bridge Fund levy is obtained by multiplying the Cumulative Bridge Fund rate (expressed in dollars per hundred dollars of Assessed Valuation) by the County Assessed Valuation and dividing by 100. The rate is limited to ten cents per hundred dollars of assessed valuation. The Cumulative Bridge Fund is covered in detail in the Indiana Code 8-16-3, which is attached as Appendix C.

Some counties have established a Major Bridge Fund to aid in their bridge funding. According to Indiana Code 8-16-3.1, which is also attached as Appendix D, counties with populations between 100,000 and 700,000 with major obstructions between commercial or population

centers may establish a Major Bridge Fund. This funding can be used for so-called *major bridges*. A *major bridge* is defined as a bridge 200 feet or more in length which traverses a depression or obstruction. The minimum length is reduced to 100 feet in cities with the following populations:

1. More than 55,000 but less than 59,000 (Lafayette- 2000 Census)
2. More than 59,000 but less than 59,700 (Terre Haute-2000 Census)
3. More than 32,800 but less than 33,000 (Michigan City-2000 Census)

The cities which fall into these population categories are listed in parentheses. Major bridge funding can also be used for underpasses of any length designed to carry motor vehicles or other moving loads. Major Bridge Fund rates are not to exceed 3.33 cents per hundred dollars of assessed valuation.

## **Eligibility of Specific Bridge Projects for Federal-Aid Funds**

To determine the eligibility and availability of Federal-aid funds for a specific county bridge project, county officials should contact:

Eric Conklin  
Inventory and Tracking Manager, Asset Management Division  
Indiana Department of Transportation  
Indiana Government Center North – Room 955  
100 N. Senate Avenue  
Indianapolis, IN 46204  
Phone: 317.233.1059

Applications for Federal-aid funds are submitted to the INDOT Division of Local Assistance for review and approval. In addition to qualifying for a specific category of Federal-aid funding, county bridge projects using Bridge R & R funds are further classified by sufficiency rating to determine the priority for replacement or rehabilitation. County bridges with lower sufficiency ratings are candidates for a higher priority of approval. Generally, Federal-aid bridge funds are available only to bridges which appear on the FHWA HBRRP "selection list". To be included on the list, the bridge must meet four criteria:

1. The Bridge must be on the NBI database. Bridges that are longer than 20 feet in length and carry a public road that is open to public travel are on the NBI database.

2. To be eligible for rehabilitation, the bridge must have a Sufficiency Rating of 80 or less; to be eligible for replacement, the bridge must have a Sufficiency Rating of less than 50.
3. The bridge must be classified as either structurally deficient or functionally obsolete. Comprehensive definitions of these classifications can be found in Appendix A.
4. The Bridge cannot have been rehabbed/reconstructed or new/replaced within the past ten years, regardless of the source of funding. In addition to checking if the bridge has been rehabbed/reconstructed or new/replaced the FHWA also checks its fiscal records to determine if any Federal-aid funds were used to rehab/replace a bridge during the past ten years.

## **County Review of Report**

Besides using this report to make a quick overall assessment of county bridge “needs”, county officials should make a special effort to assess the accuracy and completeness of the report. The essential checklist questions to be addressed are as follows:

### **INVENTORY:**

Is the bridge inventory complete? Are all county bridges (and city bridges) 20-feet or more in length and not on the state highway system listed on the computer printout? If not, the appropriate additions and corrections should be made by county personnel or by the consultant performing the bridge inventory-inspection.

### **DATA RECORDED:**

Have all the required bridge data been entered and recorded in the Inspection Report? If not, the appropriate additions and corrections should be made by county personnel or by the consultant making the bridge inventory-inspection.

### **DATA ACCURACY:**

Have the required ratings of bridge data been consistent and accurate? Weighing and assessing this question could be a tedious exercise; however, a few spot checks by state and Federal bridge engineers suggest that at least some of the ratings have been too high, thereby raising the sufficiency rating and lowering the priority for Federal-aid funding. For this reason alone, county officials should make a review of the individual bridge inventory-inspection sheets submitted in the County Bridge Inspection Report and assess the accuracy of the various ratings recorded.

County officials may make appropriate additions and corrections to the bridge data information for their respective county by requesting instructions from:

Mr. Brian Harvey, Sr. Bridge Inspection Engineer  
Indiana Department of Transportation  
Indiana Government Center North  
100 N. Senate Avenue Room N642  
Indianapolis, IN 46204  
Phone: 317.908.9096

## **Updating County Bridge Inspection Reports**

Besides reviewing this report for omissions and errors as outlined in the previous section, the National Bridge Inspection Standards program requires county officials to ensure inspection of their county bridges at least every two years with a brief summary report. Periodic inspections will provide the opportunity:

- to re-examine all county bridges for new or additional structural or foundation deterioration which has occurred since the previous inspection,
- to upgrade and refine the required data ratings on each bridge,
- to correct any omissions or errors of the previous inspection, and
- to eliminate errors in coding the bridge data for computer processing.

Some may view the expense of re-inspecting the county bridges as unwarranted; however, the increased traffic and the known ravages of weather and erosion provide convincing logic to support the need for re-inspection on a periodic basis.

Besides the direct benefits of signing and posting load limits on weak bridges, a current, up-to-date county bridge inspection program will enhance the allocation of Federal-aid funds for bridge replacement and rehabilitation. Unless Indiana has a complete and accurate inventory of bridges, there is no assurance that our state will receive its fair share of Federal-aid bridge funds.

# **Appendix A**

## Appendix A - Definitions

### ***Structurally Deficient***

This classification is given to a bridge that is restricted to light vehicles only, is closed, or requires immediate rehabilitation to remain open due to deterioration of structural components. According to the FHWA, a restricted-use structurally deficient bridge is not necessarily unsafe, and strict observance of the posted allowable traffic load and vehicle speed will generally provide adequate safeguards for those using the bridge.

Specifically, a bridge is structurally deficient **when**:

Item 5A = 1 **and**

Item 42A = 1, 4, 5, 6, 7, or 8 **and**

Item 49  $\geq$  20 ft. **and**

Item 112 = Y **and**

Item 27 (year built) and Item 106 (year reconstructed) are 10 or more years prior to the system date

**and when** it meets one or more of the following criteria:

1. Item 58 coded 0, 1, 2, 3, or 4.
2. Item 59 coded 0, 1, 2, 3, or 4.
3. Item 60 coded 0, 1, 2, 3, or 4.
4. Item 62 coded 0, 1, 2, 3, or 4 and Item 43B coded 19.
5. Item 67 coded 0, 1, or 2.
6. Item 71 coded 0, 1, or 2 and Item 42B coded 0, 5, 6, 7, 8, or 9.

### ***Functionally Obsolete***

This classification is given to a bridge on which the deck geometry, load carrying capacity (comparison of the original design load to the current state legal load), clearance, or approach roadway alignment no longer meet criteria for the system of which it is an integral part. According to the FHWA, a functionally obsolete bridge is not unsafe for all vehicles; however, it has older design features which prevents it from accommodating current traffic volumes and modern vehicle sizes and weights.

Specifically, a bridge is functionally obsolete **when**:

Item 5A = 1 **and**

Item 42A = 1, 4, 5, 6, 7, or 8 **and**

Item 49  $\geq$  20 ft. **and**

Item 112 = Y **and**

Item 27 (year built) and Item 106 (year reconstructed) are 10 or more years prior to the system date

**and when** it meets one or more of the following criteria:

1. Item 68 coded 0, 1, 2, or 3.
2. Item 69 coded 0, 1, 2, or 3 and Item 42B coded 0, 1, 2, 4, 6, 7, or 8.
3. Item 72 coded 0, 1, 2, or 3.
4. Item 67 coded 3.
5. Item 71 coded 3 and Item 42B coded 0, 5, 6, 7, 8, or 9.

Any bridge classified as ***Structurally Deficient*** is excluded from the ***Functionally Obsolete*** category. Accordingly, a bridge is first checked for structural deficiency, and then only if it is not found to be deficient is it checked for functional obsolescence.

The “items” mentioned in the above definitions are defined in the Recording and Coding Guide for the Structure Inventory and Appraisal of the Nation’s Bridges.

These definitions were compiled from the following sources:

Our Nation’s Highways: Selected Facts and Figures. Federal Highway Administration, U.S. Department of Transportation, 1998.

Recording and Coding Guide for the Structure Inventory and Appraisal of the Nation’s Bridges. Report No. FHWA-PD-96-001. Federal Highway Administration, U.S. Department of Transportation, Washington, D.C., December 1995.

The Status of the Nation’s Highway Bridges: Highway Bridge Replacement and Rehabilitation Program and National Bridge Inventory. Thirteenth Report to the United States Congress. Federal Highway Administration, U.S. Department of Transportation, Washington, D.C., May 1997.

The following paper also includes definitions and further explanations of the above-defined terms:

Dunker, K.F., and B.G. Rabbat. “Performance of Highway Bridges.” ASCE Journal of Infrastructure Systems, Vol. 1, No. 2, June 1995, pp100-119.

# **Appendix B**

**(Accompanying software is available.)**

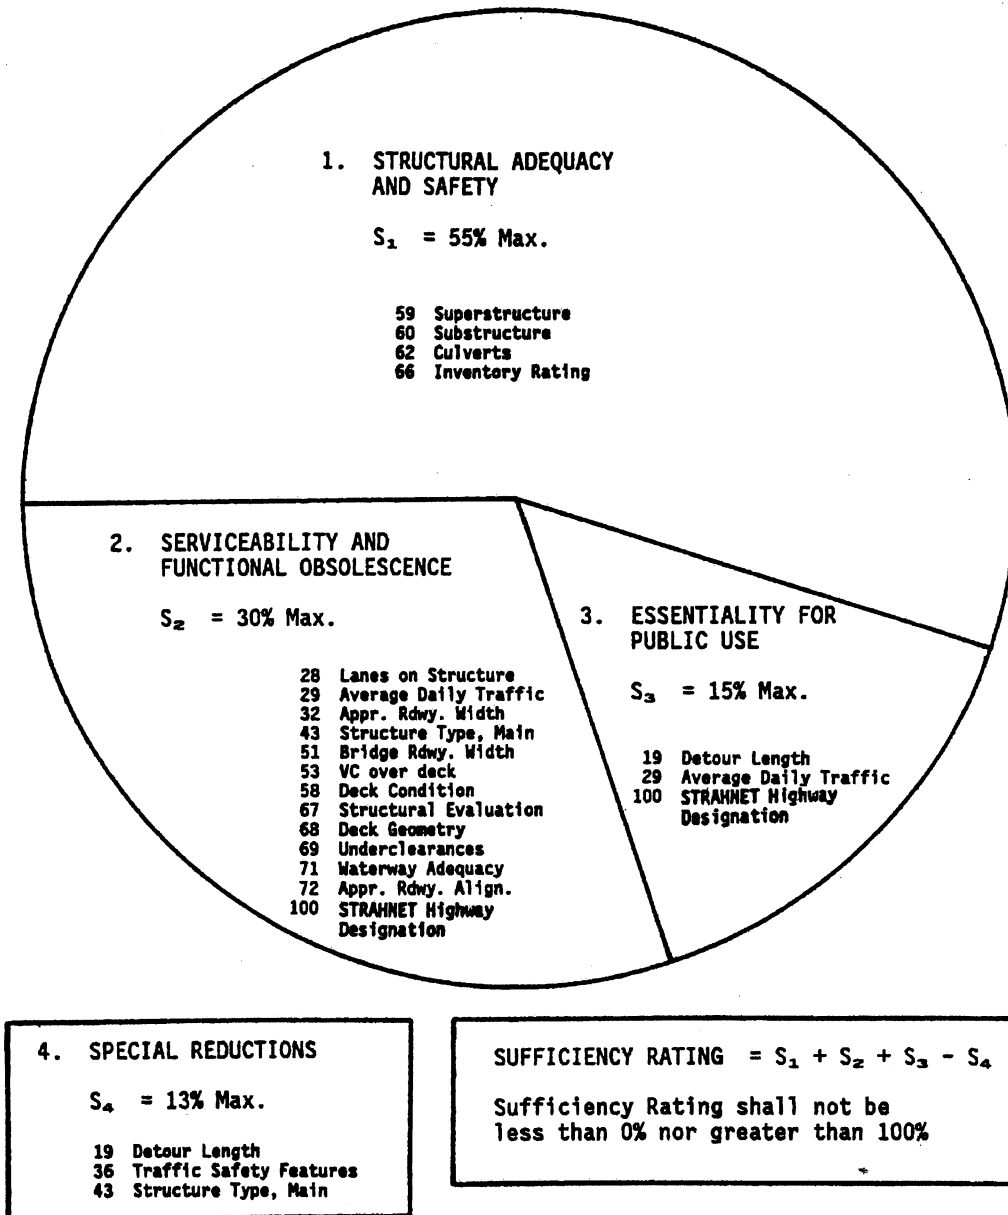

## Appendix B

### Sufficiency Rating Formula and Example

The sufficiency rating formula described herein is a method of evaluating highway bridge data by calculating four separate factors to obtain a numeric value which is indicative of bridge sufficiency to remain in service. The result of this method is a percentage in which 100 percent would represent an entirely sufficient bridge and zero percent would represent an entirely insufficient or deficient bridge.

An asterisk prefix is used to identify a sufficiency rating that was calculated even though some essential data was missing or coded incorrectly. The Edit/Update Program will substitute a value for the unusable data (which will not lower the rating) and calculate the sufficiency rating. The asterisk is dropped when the unusable data is corrected. It is normal that all culverts with Bridge Roadway Width, Curb-to-Curb - Item 51 coded '0000' will have an asterisk prefixed sufficiency.

Figure 1. Summary of Sufficiency Rating Factors

### Sufficiency Rating Formula

#### 1. Structural Adequacy and Safety (55% maximum)

##### a. Only the lowest rating code of Item 59, 60, or 62 applies.

If Item 59 (Superstructure Rating) or  
Item 60 (Substructure Rating) is

$\leq 2$	then	A = 55%
= 3		A = 40%
= 4		A = 25%
= 5		A = 10%

If Item 59 and Item 60 = N and  
Item 62 (Culvert Rating) is

$\leq 2$	then	A = 55%
= 3		A = 40%
= 4		A = 25%
= 5		A = 10%

##### b. Reduction for Load Capacity:

Calculate using the following formulas where  
IR is the Inventory Rating (MS Loading) in tons  
or use Figure 2:

$$B = (32.4 - IR)^{1.5} \times 0.3254$$

or

$$\text{If } (32.4 - IR) \leq 0, \text{ then } B = 0$$

"B" shall not be less than 0% nor greater than 55%.

$$S_1 = 55 - (A + B)$$

$S_1$  shall not be less than 0% nor greater than 55%.

FIGURE 2. Reduction for Load Capacity

2. Serviceability and Functional Obsolescence (30% maximum)

a. Rating Reductions (13% maximum)

If #58 (Deck Condition) is	$\leq 3$	then	A = 5%
	= 4		A = 3%
	= 5		A = 1%

If #67 (Structural Evaluation) is	$\leq 3$	then	B = 4%
	= 4		B = 2%
	= 5		B = 1%

If #68 (Deck Geometry) is	$\leq 3$	then	C = 4%
	= 4		C = 2%
	= 5		C = 1%

If #69 (Underclearances) is	$\leq 3$	then	D = 4%
	= 4		D = 2%
	= 5		D = 1%

If #71 (Waterway Adequacy) is	$\leq 3$	then	E = 4%
	= 4		E = 2%
	= 5		E = 1%

If #72 (Approach Road Alignment) is	$\leq 3$	then	F = 4%
	= 4		F = 2%
	= 5		F = 1%

$$J = (A + B + C + D + E + F)$$

J shall not be less than 0% nor greater than 13%.

b. Width of Roadway Insufficiency (15% maximum)

Use the sections that apply:

- (1) applies to all bridges;
- (2) applies to 1-lane bridges only;
- (3) applies to 2 or more lane bridges;
- (4) applies to all except 1-lane bridges.

Also determine X and Y:

$$X \text{ (ADT/Lane)} = \frac{\text{Item 29 (ADT)}}{\text{first 2 digits of \#28 (Lanes)}}$$

$$Y \text{ (Width/Lane)*} = \frac{\text{Item 51 (Bridge Rdwy. Width)}}{\text{first 2 digits of \#28 (Lanes)}}$$

\*A value of 10.9 Meters will be substituted when item 51 is coded 0000 or not numeric.

- (1) Use when the last 2 digits of #43 (Structure Type) are not equal to 19 (Culvert):

If (#51 + 0.6 meters) < #32 (Approach Roadway Width) G = 5%

- (2) For 1-lane bridges only, use Figure 3 or the following:

If the first 2 digits of #28 (Lanes) are equal to 01 and

$Y < 4.3$  then  $H = 15\%$

$Y \geq 4.3 < 5.5$   $H = 15 \left[ \frac{5.5 - Y}{1.2} \right] \%$

$Y \geq 5.5$   $H = 0\%$

- (3) For 2 or more lane bridges. If these limits apply, do not continue on to (4) as no lane width reductions are allowed.

If the first 2 digits of #28 = 02 and  $Y \geq 4.9$ ,  $H = 0\%$

If the first 2 digits of #28 = 03 and  $Y \geq 4.6$ ,  $H = 0\%$

If the first 2 digits of #28 = 04 and  $Y \geq 4.3$ ,  $H = 0\%$

If the first 2 digits of #28  $\geq 05$  and  $Y \geq 3.7$   $H = 0\%$

- (4) For all except 1-lane bridges, use Figure 3 or the following:

If  $Y < 2.7$  and  $X > 50$  then  $H = 15\%$

$Y < 2.7$  and  $X \leq 50$   $H = 7.5\%$

$Y \geq 2.7$  and  $X \leq 50$   $H = 0\%$

If  $X > 50$  but  $\leq 125$  and

$Y < 3.0$  then  $H = 15\%$

$Y \geq 3.0 < 4.0$   $H = 15(4 - Y)\%$

$Y \geq 4.0$   $H = 0\%$

If  $X > 125$  but  $\leq 375$  and

$Y < 3.4$  then  $H = 15\%$

$Y \geq 3.4 < 4.3$   $H = 15(4.3 - Y)\%$

$Y \geq 4.3$   $H = 0\%$

Figure 3. Width of Roadway Insufficiency

If  $X > 375$  but  $\leq 1350$  and

$$\begin{array}{lll} Y < 3.7 & \text{then} & H = 15\% \\ Y \geq 3.7 < 4.9 & & H = 15 \left[ \frac{4.9 - Y}{1.2} \right] \% \\ Y \geq 4.9 & & H = 0\% \end{array}$$

If  $X > 1350$  and

$$\begin{array}{lll} Y < 4.6 & \text{then} & H = 15\% \\ Y \geq 4.6 < 4.9 & & H = 15 \left[ \frac{4.9 - Y}{1.2} \right] \% \\ Y \geq 4.9 & & H = 0\% \end{array}$$

$G + H$  shall not be less than 0% nor greater than 15%.

c. Vertical Clearance Insufficiency - (2% maximum)

If #100 (STRAHNET Highway Designation)  $> 0$  and

$$\begin{array}{lll} \#53 \text{ (VC over Deck)} \geq 4.87 & \text{then} & I = 0\% \\ \#53 < 4.87 & & I = 2\% \end{array}$$

If #100 = 0 and

$$\begin{array}{lll} \#53 \geq 4.26 & \text{then} & I = 0\% \\ \#53 < 4.26 & & I = 2\% \end{array}$$

$$S_2 = 30 - [ J + (G + H) + I ]$$

$S_2$  shall not be less than 0% nor greater than 30%.

3. Essentiality for Public Use (15% maximum)

a. Determine:

$$K = \frac{S_1 + S_2}{85}$$

b. Calculate:

$$A = 15 \left[ \frac{\#29(ADT) \times \#19(DetourLength)}{320,000 \times K} \right]$$

"A" shall not be less than 0% nor greater than 15%.

c. STRAHNET Highway Designation:

If #100 is > 0                      then      B = 2%

If #100 = 0                        then      B = 0%

$$S_3 = 15 - (A + B)$$

S<sub>3</sub> shall not be less than 0% nor greater than 15%.

4. Special Reductions (Use only when S<sub>1</sub> + S<sub>2</sub> + S<sub>3</sub> ≥ 50)

a. Detour Length Reduction, use Figure 4 or the following:

$$A = (\#19)^4 \times (7.9 \times 10^{-9})$$

"A" shall not be less than 0% nor greater than 5%.

b. If the 2nd and 3rd digits of #43 (Structure Type, Main) are equal to 10, 12, 13, 14, 15, 16, or 17; then

$$B = 5\%$$

c. If 2 digits of #36 (Traffic Safety Features) = 0      C = 1%  
If 3 digits of #36    = 0      C = 2%  
If 4 digits of #36    = 0      C = 3%

$$S_4 = A + B + C$$

S<sub>4</sub> shall not be less than 0% nor greater than 13%.

---

$$\text{Sufficiency Rating} = S_1 + S_2 + S_3 - S_4$$

The Rating shall not be less than 0% nor greater than 100%.

Figure 4. Special Reduction for Detour Length

## EXAMPLE

### Calculation of Sufficiency Rating

#### 1. Structural Adequacy and Safety

$$A = 10\%$$

$$B = [32.4 - (19.8 \text{ metric tons})]^{1.5} \times 0.3254 = 14.6$$

$$S_1 = 55 - (10 + 14.6) = 30.4$$

#### 2. Serviceability and Functional Obsolescence

$$A = 3\%, B = 1\%, C = 4\%, D = \text{NA}, E = \text{NA}, F = \text{NA}$$

$$J = (3 + 1 + 4) = 8\%$$

$$X = \frac{18500}{2} = 9250 \quad Y = \frac{7.9 \text{ m}}{2} = 3.95$$

$$(1) \quad \text{If } (7.9 + 0.6) < 12.2 \quad \text{then} \quad G = 5$$

$$(2) \quad \text{Not Applicable}$$

$$(3) \quad \text{Not Applicable}$$

$$(4) \quad \text{If } X = 9250 \quad \text{and } Y = 3.95 \quad \text{then} \quad H = 15$$

$$G + H = 5 + 15 = 20 \text{ (however, maximum allowable} = 15)$$

$$I = 0$$

$$S_2 = 30 - [8 + (15) + 0] = 7.0$$

#### 3. Essentiality For Public Use

$$K = \frac{30.4 + 7.0}{85} = 0.44$$

$$A = 15 \left[ \frac{18,500 \times 12.8 \text{ Km}}{320,000 \times 0.44} \right] = 25.2 \text{ (however, max allowable} = 15)$$

$$B = 0$$

$$S_3 = 15 - (15 + 0) = 0$$

4. Special Reductions

$$S_1 + S_2 + S_3 = (30.4 + 7.0 + 0.0) = 37.4 < 50$$

$$S_4 = \text{NA}$$

---

$$\text{SUFFICIENCY RATING} = 30.4 + 7.0 + 0.0 = 37.4$$

---

### **IC 8-16-3**

#### **Chapter 3. Cumulative Bridge Fund**

### **IC 8-16-3-0.5 Repealed**

*(Repealed by P.L.113-1989, SEC.11.)*

### **IC 8-16-3-1**

#### **Authorization to provide fund**

Sec. 1. Notwithstanding IC 8-18-8-5, all municipal corporations and county executives may provide a cumulative bridge fund to provide funds for the cost of construction, maintenance, and repair of bridges, approaches, and grade separations. However, in those counties in which a cumulative bridge fund has been established, the county executive is responsible for providing funds for all bridges, including those in municipalities, within the counties except those bridges on the state highway system. The county executive may use this fund for making county wide bridge inspection and safety ratings of all bridges in a county not on the state highway system. The inspection and safety ratings shall meet all the criteria of the National Bridge Inspection Standards promulgated by the Federal Highway Administration, U.S. Department of Transportation and shall be supervised and approved by a competent, qualified engineer, registered in the state.

*(Formerly: Acts 1951, c.299, s.1; Acts 1957, c.76, s.1; Acts 1971, P.L.101, SEC.1; Acts 1973, P.L.72, SEC.1.) As amended by Acts 1977, P.L.113, SEC.1; P.L.86-1988, SEC.18; P.L.17-1995, SEC.8.*

### **IC 8-16-3-1.5**

#### **Definitions**

Sec. 1.5. As used in this chapter:

(1) "Bridge" means any structure designed to carry vehicular traffic over or under an obstacle to the normal flow of traffic and including any grade separation, culvert, or approach to a bridge.

(2) "Approach" means any part of a road or street which is required to make a bridge a viable part of a county road or city street system but which does not extend more than five hundred (500) feet from the bridge.

(3) "Construction" means both construction and reconstruction to a degree that new,

supplementary, or substantially improved traffic service is provided and significant geometric or structural improvements are affected.

(4) "Cost" means all expenditures required to construct, maintain, or repair a bridge, including engineering, equipment, land acquisition, materials, contracts, and bond interest.

(5) "Municipal corporation" means a city or town.

*As added by Acts 1977, P.L.113, SEC.2. Amended by P.L.8-1989, SEC.54; P.L.104-1993, SEC.1.*

### **IC 8-16-3-2**

#### **Tax levy**

Sec. 3. (a) To provide for the cumulative bridge fund, county executives and municipal legislative bodies may levy a tax in compliance with IC 6-1.1-41 not to exceed ten cents (\$0.10) on each one hundred dollars (\$100) assessed valuation of all taxable personal and real property within the county or municipality.

(b) The tax, when collected, shall be held in a special fund to be known as the bridge fund.

(c) An appropriation from the bridge fund may be made without the approval of the department of local government finance if:

(1) the county executive requests the appropriation; and

(2) the appropriation is for the purpose of constructing, maintaining, or repairing bridges, approaches, or grade separations.

### **IC 8-16-3.1**

#### **Chapter 3.1. Major Bridge Fund**

### **IC 8-16-3.1-1**

#### **Definitions**

Sec. 1. (a) As used in this chapter, "eligible county" means a county that has:

(1) a population of more than one hundred thousand (100,000) but less than seven hundred thousand (700,000); and

(2) a major obstruction between commercial or population centers which is capable of causing an economic hardship because of excess travel required to conduct a normal level of commerce between the two (2) centers. A major obstruction which is a part of a county boundary or a state boundary does not qualify for the purpose of this chapter.

(b) As used in this chapter, "major bridge" means the following:

(1) A structure that is two hundred (200) or more feet in length and that is erected over a depression or an obstruction for the purpose of carrying motor vehicular traffic or other moving loads. However, the structure shall be one hundred (100) or more feet in length in a city having the following population:

(A) More than fifty-five thousand (55,000) but less than fifty-nine thousand (59,000).

(B) More than fifty-nine thousand (59,000) but less than fifty-nine thousand seven hundred (59,700).

(C) More than thirty-two thousand eight hundred (32,800) but less than thirty-three thousand (33,000).

(2) An underpass of any length that is designed to carry motor vehicle traffic or other moving loads.

(c) As used in this chapter, "major obstruction" means a physical barrier to the passage of motor vehicle traffic that inhibits the use of the customary highway construction techniques to bridge the barrier without use of a grade separation structure.

*As added by Acts 1979, P.L.96, SEC.1. Amended by Acts 1982, P.L.1, SEC.28; P.L.86-1988, SEC.21; P.L.12-1992, SEC.65; P.L.61-1992, SEC.1; P.L.1-1993, SEC.50; P.L.170-2002, SEC.67.*

#### **Creation of fund; purpose; tax levy**

Sec. 4. (a) The executive of any eligible county may provide a major bridge fund in compliance with IC 6-1.1-41 to make available funding for the construction of major bridges.

(b) The executive of any eligible county may levy a tax in compliance with IC 6-1.1-41 not to exceed three and thirty-three hundredths cents (\$0.0333) on each one hundred dollars (\$100) assessed valuation of all taxable personal and real property within the county to provide for the major bridge fund.

*As added by Acts 1979, P.L.96, SEC.1. Amended by P.L.86-1988, SEC.22; P.L.17-1995, SEC.10; P.L.178-2002, SEC.78.*
